

European Coordinators of the World Conference of
Grassroots Women

Halinka Augustin / Netherlands

Susanne Bader / Germany

Substitute:

Zaman Masudi / Germany

World Women in Europe, Africa, Asia, Latin America, Middle East call for:

On February 24, Russia opened a war against Ukraine.

A war that is being waged only at the expense of the population, which puts the burden on the broad masses, children and women. Many more will pay for it with their lives.

We condemn this war!

We demand the immediate withdrawal of all Russian troops from Ukraine.

We also fight against all imperialist powers, including the USA, NATO and the EU.

We call you, organize days of solidarity, especially with the women and children in Ukraine. Let's be active in every country, in every city, village, municipality, at the workplace, with neighbors and friends.

Let's take advantage of the preparations for our common day of struggle, International Women's Day and for the 3rd World Conference on Women in Tunis in 2022. Be active among the masses of women. Consult with them how we can organize internationally in an anti-imperialist women's platform.

Let us raise our st immen and become active for a peace movement against all imperialist wars and for world peace.

Let us make International Women's Day a manifestation for world peace.

We keep it with Clara Zetkin.

"Only when the great mass of women with deepest conviction stands behind the slogan 'War on War,' then peace can be secured for the peoples."

For war will stop only when the people rise up, the people in the countries concerned, first and foremost in Russia, but also in many other countries, in our homelands.

Hail to international solidarity!

Send us reports about the mood in your in your country, what do the people to this war and the danger of a World War 3.
